

Service/start-up engineer

To satisfy our Chinese customers with a quick response and meet customer demand, we newly established Shanghai Sunds Fibertech company in Waigaoqiao, Shanghai, with a new modern office. We are now recruiting two service/start-up engineers with experience in service and start-up of plants.

About the position

We are looking for service personnel that mainly work on-site at our clients, and partly from our office in Shanghai or at home based office. You are often our client interface, and your role is to provide preventative, corrective maintenance and erection/start up support in a way that is appreciated by our customers.

To offer the best possible customer experience your ability to communicate verbally and in writing is important. You will have a lot of clients contact and head office contact as well. So, it is a must that you will be able to communicate in English.

Your profile

To be successful in your role we would like you to have experience from similar roles, preferably in the process industry, with an education background of mechanical or automation engineering. Experience from the Panelboard or Paper and pulp industry is a plus.

You should be able to work well with others and be action-oriented as a person. You must be comfortable meeting new people as customer contact is a natural part of the job. In order to live up to our customers' expectations it is also important that you can work toward set goals and take accountability for customer satisfaction.

Application

Please send an application including your CV and a personal letter to any of the below contacts:

Steven Zhang steven.zhang@sundsfibertech.com

Lars Eklund lars.eklund@sundsfibertech.com

We aim to complete this recruitment as soon as possible so we would like to receive your application by July 31, 2018 at the latest.

For more information please contact Steven Zhang:
steven.zhang@sundsfibertech.com
