

PressBooster™

压机增压器

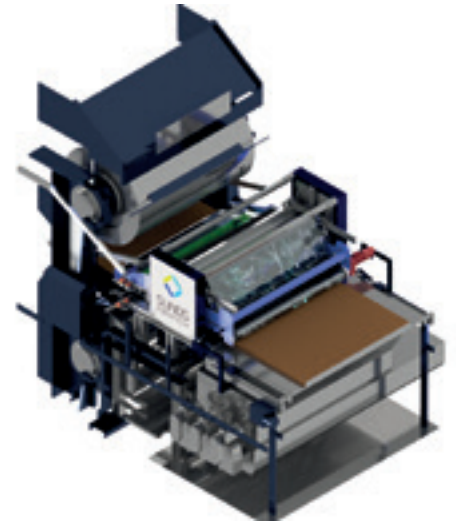

板坯蒸汽预加热器 Mat Steam Preheater

现有工厂可提高20%的产能。
20 % capacity increase in existing plants.

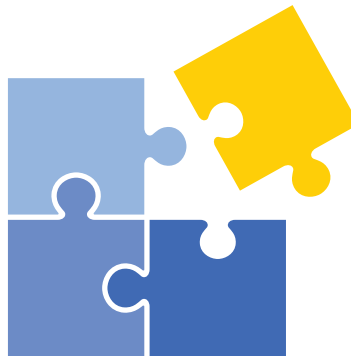

易安装 - 24小时的停机。
Easy and fast installation – 24 hours shut down.

我们的板坯预加热器拥有最好的工业技术适用于中密度和刨花板生产线。
Our mat pre heater, best in industry technology, for MDF and Particle.

我们的板坯预加热器拥有最好的工业技术适用于中密度和刨花板生产线:

- 优化投资成本, 提高压机的产能
- 现有工厂可提高20%的产能
- 适用于新上线和现有生产线的添加
- 现有生产线的添加容易
- 头向压机进行安装
- 非常短小精干的设计有益于高效的排气
- 改善了密度分布
- 结实易维护
- 基于经过验证的供货技术改进了设计和功能

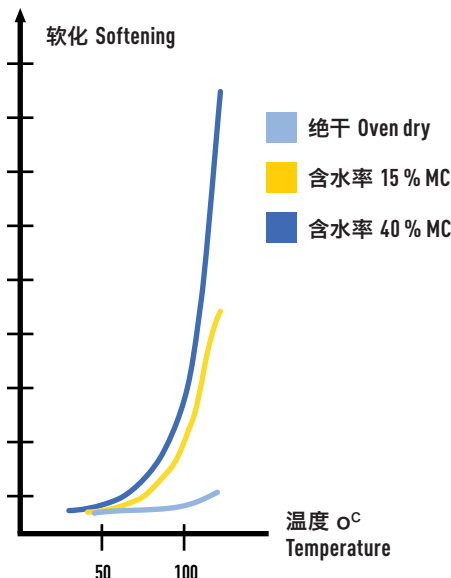

头向压机进行安装。
Installed head to head to press.

透气带的自动清洁系统, 业内最好。
Automatic wire cleaning system, best in industry.

Our mat pre heater, best in industry technology, for MDF and Particle board lines, will:

- Optimize investment cost for capacity increase of the press
- 20 % capacity increase in existing plants
- For new and existing installations
- Easy adaptive to existing lines
- Installed head to head to press
- Very slim and short design facilitated by efficient deaerating
- Improve density profile
- Robust and maintenance friendly
- Based on proven reference technology with improved design and functions

降低热压过程的成本和磨损
Reduce cost and wear when pressing

纤维软化作为含水率和温度的函数。
Fiber softening as a function of MC and temperature.
