

Steam atomizing resin system

蒸汽施胶新系统

提高了系统的持续运行性和节胶 Improved runnability and resin saving

REDUCE RESIN CONSUMPTION
降低了胶耗

EASY INSTALLATION
易安装 - 插入式设计

胶管带冷却水夹套避免胶的预固化。
Double walled water cooled resin pipe to avoid pre-cure of resin

颂智公司最佳化的蒸汽施胶系统优势:

- 分布了多个喷嘴将胶均匀地喷到纤维上以达到胶优化分布
- 独立的蒸汽喷射系统改善了胶的分布
- 胶管带冷却水夹套避免胶的预固化
- 喷嘴自动清洁
- 成熟和坚固的设计、不锈钢元器件
- 由于喷嘴分布数量多和独特的混合管降低了胶耗
- 由于喷放管无粘结减少了维护清洁
- 提高了板的性能如内部键合力且表面无斑
- 易安装 - 插入式设计

Sunds optimized resin system advantages:

- Multiple nozzle arrangement to spread out the resin even to the fiber for optimized resin distribution
- Separate steam injection to improve resin distribution
- Double walled water cooled resin pipe to avoid pre-cure of resin
- Automatic cleaning of nozzles
- Proven and solid design, stainless steel components
- Reduced resin consumption because of the multiple nozzle arrangement and unique mixing chamber
- Less maintenance cleaning because of no build ups in blowline
- Improved panel properties such as internal bond and no resin spots
- Easy installation – plug in design

提高了板的性能如内部键合力且表面无斑。
Improved panel properties.
