

Küsters press upgrades

A wide selection of upgrade kits for Küsters presses available

Example of upgrade:

New belt and chain carpet control system eliminate issues with belt and chain carpet run out included in the system.

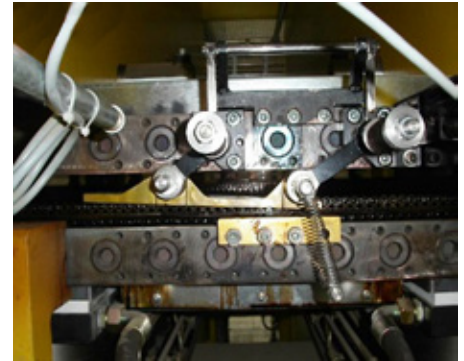

- Control rolls.
- Guide plates.
- Belt positioning device.
- Control and software.
- New chains.

Advantages:

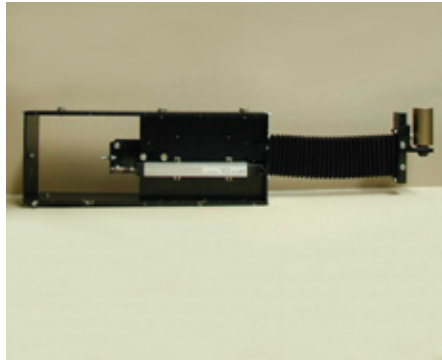

- Exact belt position within the infeed.
- Control of the belt and roller carpet during production.
- Roller carpet elements do no longer touch the lateral guides.
- No problems with belt- and chain run when changing the production to another thickness and/or width.
- Increased current consumption at production start is avoided.
- High quality chains.

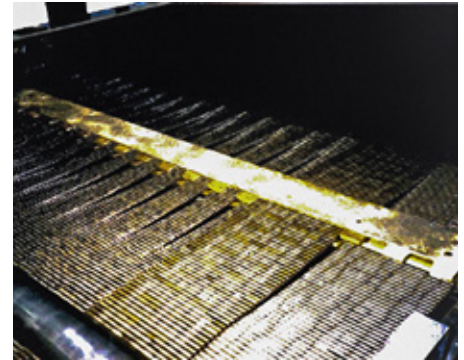

Control rolls
