

# SeMAX™

Re-build your pendistor to a semi mechanical forming station

SeMAX™ Levelling roller – reduce your fiber-circulation to below 5 %.

## Automatically forming accuracy control

Weight control, improved forming accuracy – improve the cross mat profile (Piano).

Our Pendistor upgrades will:

- Reduce power consumption.
- Improve your forming accuracy.
- Reduce amount of scalping.
- Reduce fiber re-circulation.
- Reduce resin consumption.
- Improve weight control.
- Be retrofitted in all types of formers.
- Be easy to install.

## Smoothens out the fiber mat surface before scalping
